

Cosmetics

Innovating beauty science

With the acquisition of **Bionos Biotech**, a new synergy is born with **LabAnalysis Group** laboratories in the field of testing and formulation of cosmetic products.

The cosmetics industry is constantly changing and has many facets, but our **knowledge** is transversal and solid in the field of efficacy and tolerability tests, validation of new raw materials and formulation.

Our **experts** can support the Clients with courses and consulting services, offering a wide portfolio of testing and development on skin-care, detergents and, in particular sunscreen and make-up - the flagship of *Made in Italy*.
